## Extended Minor Surgery Service

### **ADVICE FOLLOWING A SHAVE EXCISION OF A BIOPSY**

If a dressing is applied leave in place for 24 hours and keep area clean and dry.

If the area is on the face, an antibiotic ointment will have been applied. Wash with soap and water and pat dry 3-4 times a day.

Apply clean Vaseline for 4-5 days.

Elsewhere on the body a plastic dressing spray will have been applied to protect the area for a few days. This will peel after a few days.

Any concerns please contact your own GP surgery or ourselves on 01225 898015.
